ANTI-TRUST POLICY

Expositions by their very nature bring competitors together. Accordingly, it is necessary to avoid discussions of sensitive topics and especially important to avoid recommendations with respect to sensitive subjects. Agreements to fix prices, allocate markets, and engage in product boycotts and to refuse to deal with third parties are automatically illegal under the antitrust laws. Also discussion of prices (including elements of prices such as allowances and credit terms), quality ratings of suppliers, and discussions which may cause a competitor to cease purchasing from a particular supplier, or selling to a particular customer, should be avoided. An antitrust violation does not require proof of a formal agreement. A discussion of a sensitive topic, such as prices, followed by parallel action by those involved or present at the discussion is enough to show a price fixing conspiracy. As a result, those attending CAPCA Agri-Expo should remember the importance of avoiding not only unlawful activities but even the appearance of unlawful activities.
